

## 13.56 MHz Antennas Tunnel-Antenna

### SAT-Tunnel-13MHz

3D scanner system for scanning 13.56 MHz labels position independent

**Technical Data:**

Type:	Info:	Size:
SAT-Tunnel-13MHz	antenna system mounted in an industrial housing, IP20	(430 x 430 x 600) mm inside (550 x 550 x 600) mm outside
Roller Conveyor (opt.)	special plastic roller conveyor for inside mounting of the tunnel	(390 x 600 x 40) mm

**Order Information:**

SAT-Tunnel-13MHz	Order-No.:400.2020
Roller Conveyor	Order-No.:400.2030

Features:

cleaning:	damp cloth
mounting:	none metal environment. E.g. For optimal performance please do not place any metal devices in a distance of 50cm around the tunnel.
operating temperature range:	5°C to 50°C

Tips and hints:

- The tunnels detects HF transponders in an area of up to 1m around the tunnel.
- Pay attention that no other 13.56MHz transmitters be placed close to the tunnel. This may have an influence on the performance.
- On transportation please handle with care.
- Done store and use at wet environment.
- Be sure that tunnel and reader are connected properly
